Career Objective

Aspiring software engineer with hands-on experience in developing web and desktop applications using Java, PHP, and JavaScript. Strong foundation in database management and backend development, with a proven ability to design and implement user-centric solutions. Seeking to leverage my technical expertise and problem-solving skills in a dynamic organization, while continuing to grow in software engineering and contribute to innovative projects.

Professional Skills

- **Technical Skills:** HTML, CSS, PHP, JS, JAVA, SQL.
- **Soft Skills:** Teamwork, Communication Skills, Problem-Solving, Adaptability, Time Management.

Projects

Human Finder ([GitHub Link](#))

Technologies used: HTML, CSS, JavaScript, PHP, Python

- Developed "Human Finder," a web application designed to assist in locating missing individuals by providing a user-friendly platform for efficient and reliable searches.
- Enhanced the system's usability and effectiveness through advanced search capabilities and automated data validation.

AMVB Hotel ([GitHub Link](#))

Hotel management system for automating room reservations and billing processes using JAVA & MySQL

- Developed a comprehensive Hotel Management System using Java for back-end logic and MySQL for data storage, ensuring data integrity and efficient functionality.
- Defined key features such as room reservations, guest management, and billing processes through meticulous requirements gathering.

AMVB Bank ([GitHub Link](#))

Comprehensive banking system for account and transaction management using JAVA & MySQL

- Designed and implemented a Banking System using Java and MySQL (via JDBC), enabling secure account management, user authentication, and transaction processing.
- Developed key functionalities such as user registration, login, debit, credit, fund transfers, and balance inquiries, with a user-friendly console interface.
